

SPACE RENTAL

HANGAR, CENTRE FOR ARTISTIC RESERACH AND PRODUCTION

Hangar is located in the Can Ricart complex, an industrial area in the Poblenou district of Barcelona that dates back to the mid-19th century and was designed for the textile industry. The building occupied by Hangar was used by various companies until the industrial activities of the building ceased in 1991.

Currently, and after the extension of the centre of the adjacent buildings, the installations destined to Hangar occupy a total surface area of 2600 m², distributed in 4 buildings, among which there are three spaces that are rented to artists, projects and cultural productions according to availability:
