HANGAR. CENTER FOR ART RESEARCH AND PRODUCTION

Hangar is based in the Can Ricart complex, an industrial setting in the Poblenou neighborhood of Barcelona.

The architecture dates back to the mid-nineteenth century and was conceived for the textile industry. Different companies succeeded each other in the building occupied by Hangar until the closure of the industrial activities of the building in 1991.

At the moment, and after the extension of the center of the adjacent warehouses, the buildings destined to Hangar occupy a joint surface of 2.600 m² that are distributed in 4 buildings, between which are the three spaces that are rented to artists, projects and productions cultural according to availability:

RICSON - MULTIPURPOSE SPACE - PHOTO SET
